## Grains, Grasses, Legumes -- August, 1956

GRASSES -- With Midwestern states short on moisture this season, production of such grass seeds as brome, timothy, bluegrass and fescues is not expected to equal that of last year. However, carry-over plus new crop should provide ample supplies with prices a little higher than the low levels of last season.

The acreage and conservation reserve programs possibly will increase demands for some grass seed items but not to the extent expected earlier. At this time there is no indication of shortages of any grass seed items.

LEGUMES -- Carry-over of Alfalfa seed plus prospects for new crop seed is favorable for continued reasonable alfalfa seed prices. At present, the red clover crop does not appear to be equal to that of last year. However, demand and usage of red is less than formerly, and with competition from alfalfas, prices should not get out of line.

Prospects for ladino, alsike and sweet clover are average and there is no apparent shortage of legume seeds.

Many of the newer alfalfa, clover and grass varieties are being produced in larger quantities and should be equal to the demand for them.

### FALL GRAINS

In some localities, weather conditions have been unfavorable for harvesting the wheat, oats and barley crops. Test weights and general appearance may not be quite equal to that of last season. Certification on barley and most wheat varieties is completed so prompt shipment or pickup can be made.

Prices have been kept at reasonable levels with many producers feeling that seed grain demand will be greater than the available supply. Early ordering is suggested to get your first choice variety.

A brief description of the grain varieties handled is given on the inside page of the price list. If a variety not listed is desired, we will make every effort to try to locate and get it for you.

For summer seedings and winter grain crops start with good seed. Try SCOTTS.

Sincerely,

SCOTT FARM SEED COMPANY.

# Retail Price List

"SCOTTS" grade is the highest quality seed available. It is carefully selected and noxious weed free. Most lots will test 99.75% pure seed or higher.

MECHANICSBURG  
OHIO

August, 1956

CHOICE BRAND: Choice, clean seed, low in weed content. Higher quality than is generally available at comparable prices. SCOTTS grade used in all mixtures.

## PASTURE GRASSES

SCOTTS Fall Pastureland Mix	
\$ .38 lb.	
Pastureland Mix is a blend of the most desirable grasses and legumes to suit a variety of soil, moisture and fertility conditions as found in typical permanent pasture fields.	
This mixture contains one-third legumes and two-thirds grasses by weight. All seeds are high in quality and germination, low in weed content and free of noxious weeds. Sow 25 lbs. per acre for a new pasture and 12-15 lbs. per acre for reseeding.	
Certified Ky. 31 Fescue ....	.21 lb.
Choice Brand Ky. 31 Fescue ....	.18 lb.
Meadow Fescue .....	.30 lb.
Ryegrass (Perennial) .....	.20 lb.
Ryegrass (Annual) .....	.15 lb.
Ky. Bluegrass .....	.90 lb.
Redtop .....	.70 lb.
Reed Canary Grass .....	.40 lb.
Orchard Grass (Onion Free) .....	.32 lb.
S-37 Orchard Grass .....	.42 lb.

SCOTTS Heavy Duty Pasture Mix	
\$ .42 lb.	

Fifteen per cent Ranger Alfalfa and a total of 35 per cent legumes in this high yielding mixture that is also suitable for hay or first cutting silage.

SCOTTS Heavy-Duty Mix is suggested where the field is to be left in pasture for at least five years and where heavy grazing is desired. Apply fertilizer, and lime where needed, and follow recommended seeding methods. Sow 25-30 lbs. per acre.

## LEGUME INOCULATION

1 bu. Size (Alfalfa-Clover) .....	\$ .60 ea.

Certified Kenbar Barley .....	2.25 bu.
Certified Hudson Barley .....	2.25 bu.
Certified Dayton Barley .....	2.50 bu.
Certified Dubois Winter Oats .....	bu.

# GRAIN VARIETY DESCRIPTION

# **WHEAT - BARLEY - RYE - OATS**

**SENECA**—The most widely grown variety in Ohio; also popular in many other states. It is red chaffed, beardless, stiff-strawed, high yielding and in normal seasons has good test weight.

**THORNE**—Similar to Seneca in color, standing ability, milling qualities and in yield. Once the most widely used soft red winter wheat variety. Is being replaced by Seneca.

**PENNOLL**—A Pennsylvania variety, tall, stiff strawed, white chaffed and beardless. High in test weight, excellent yielder and winter hardy.

**VIGO**—An Indiana wheat, winter hardy, excellent test weight, white chaffed, beardless, not quite so stiff-strawed as Seneca, has performed best in western Ohio.

**BUTLER**—A bearded white chaffed variety with good test weights, stiff straw and winter hardy. Most popular in southern and western Ohio.

**KNOX** — A new Indiana wheat, winter hardy, high yielding, medium short, white chaffed and beardless. About a week earlier in maturity than other recommended varieties. Has not given uniform yield performance in Ohio.

**KENBAR BARLEY**—Is a high yielding early variety with better than average stem strength and winter hardiness. All barleys should be sown 10 days or two weeks ahead of wheat to get well started before winter.

**HUDSON BARLEY**—A stiff-strawed, medium early variety with resistance to barley diseases. Yields and test weights have equalled or exceeded other varieties.

**DAYTON BARLEY**—A new variety equal to Kenbar in test weight, strength of straw and winter hardiness but has been higher yielding. Adapted to the same area as Kenbar.

**BALBO RYE**—A rapid growing variety producing good grain yield and excellent early fall and early spring pasture.

**T. P. RYE**—Introduced as Tetra Petkus, vigorous stiff-strawed, high yielding, starts more slowly than Balbo and comes along later in the spring.

**DUBOIS WINTER OATS**—High yielding, moderately stiff straw, medium early, more winter hardy than other varieties. Less winter hardy than wheat or barley and should be sown early to get well started before winter.

# **Scott Farm Seed Company, Mechanicsburg, Ohio**

THE SCOTT FARM SEED COMPANY warrants to the extent of the purchase price that seeds sold are as described on the container within recognized tolerances. Seller gives no other or further warranty, expressed or implied.
